# SMARTBOARD

## Aidata Smartboard

65" interactive screen with integrated OPS computer offers a brand new exciting experience. By using your fingers or the stylus, the 20-point touch system lets you interact, create drawings and take notes on whatever shows on the screen. Intel powered OPS computer is buried on the rear side of the display.

## Setup

Setup is extremely easy. All you'll need to do is plugging the power cord to the wall. The OPS supports both Linux and Windows operating systems.

## Controls

You can completely control your computer using the touch screen. With the reinforced protection against impacts, the touchscreen is safe to use, even for young students.

Touchscreen also offers a variety of developments for your workspace like interactive presentations, productive video meetings.

The 4K Ultra High Definition panel provides a clear, sharp and bright image that can be easily read from far side of the room.

## Connections

You can mirror your screen with onboard HDMI and VGA ports, and through the USB-B port you can control the panel from your computer.

Besides the cable connections, the product offers Bluetooth and wireless with two powerful antennas placed on the OPS computer.
